Projects:

Millenial Garage Project Tracker Jul,2021 - Oct,2021

- Examined, cleaned, and processed facts to get insights from a live dataset.
- Created an interactive dashboard using the PowerBI tool after analyzing the dataset to determine the state of the project.
- The dashboard can be filtered out on the dashboard based on geolocation, project status, and project managers.

Technology: Power BI

Internal Project Management Oct,2021 - Dec,2021

- Developed a React component "Add to Project" for quick creation of new projects using a user-friendly form with react-hook-forms.
- Created "Project Listing" component for displaying existing projects in an organized and user-friendly manner.
- Implemented filter and sorting features in the project listing page for easy organization of projects based on specific criteria, with React routing for seamless navigation between pages.
- Utilized React-Bootstrap for styling the components, ensuring consistency and responsiveness across different devices and browsers.
- Added React routing for seamless navigation between the "Add to Project" and "Project Listing" pages.
